DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed October 8, 2003 fails to comply with the provisions of 37 CFR 1.97, 1.98 and MPEP § 609 because the reference by Zhu, Min-Li et al. "Branched NRD Guide Directional Coupler" does not contain a date.

It has been placed in the application file, but the information referred to therein has not been considered as to the merits. Applicant is advised that the date of any re-submission of any item of information contained in this information disclosure statement or the submission of any missing element(s) will be the date of submission for purposes of determining compliance with the requirements based on the time of filing the statement, including all certification requirements for statements under 37 CFR 1.97(e). See MPEP § 609 ¶ C(1).

Allowable Subject Matter

Claims 1 – 8 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

Sato shows an NRD waveguide device comprising slots or through holes (26a,b – Fig. 1, Fig. 2b, Fig. 3 et al.) between the first and second NRD waveguides (24, 25) comprising a multiple hole plate (22) but does not teach the multiple hole plate (22) being conductive nor including two rows of holes. Sato does not specify the material of plate 22 nor teaches or suggests the plate comprising two rows of through holes. Similarly Hiramatsu only shows a single slotted dielectric NRD waveguide.

Kim shows a NRD filter comprising a single dielectric having two rows of metal posts where the holes of the dielectric are an intermediate step subsequently filled by metal posts, thus not comprising thru holes, thus the claims are in condition for allowance.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kim – shows a metal post NRD waveguide filter.
